The death of the empire's patron god, Aroden, resulted in a power struggle among the nation's various noble houses. ISBN 978-1-64078-254-9 † Hal Maclean, Colin Moulder-McComb, Jason Nelson, Jonathan Keith, and Hank Woon. The Inner Sea World Guide, p. 11. If you look at my bibliography, it's mostly a series of interviews. The course of the next nine years, and Taldor's ill-advised attempt to lay claim to central Garund finally came to a calamious end wth its defeat by the forces of the Gorilla King in 2089 AR.[6][9] In the year 4081 AR, the region cut its ties with the Taldan empire. By 1750 AR, nearly all Taldan vessels were built in Augustana. In order to launch its disastrous Sixth Army of Exploration, the Taldan government conscripted thousands of local Andoren militia members, and sent them off on commandeered ships to Garund. [12] Andoren government (and Andoren society as a whole) are built on three principles: the tolerance of all benevolent religions, a transparent government, and an efficient, prosperous system for trade.[11] To ensure that all are treated fairly and that no one abuses the power of their office, public servants in Andoran are regarded with a measure of suspicion and subject to regular scrutiny.[3] Main article: People's Council The nation's ruling body is a group of 350 representatives known as the People's Council. ISBN 978-1-60125-205-0 ISBN 978-1-60125-269-2 † 11.0 11.1 11.2 James Jacobs et al. Facing challenges of corruption and decadence from within, as well as an invasion by Qadira across the empire's southern border, Taldor was forced to cede Andoran to Cheliox without a single battle.[3][7][2] Under Cheliox's rule, Andoran flourished for hundreds of years. For additional resources, see the Meta page. (2015). Because of this, Andorens in general are seen as troublemakers abroad.[2] Katapeshi slavers in particular has been in the crosshairs of the Andoren government for the past decade, after Codwin I and the People's Council made it legal to board and sink Katapeshi slave ships in 4704 AR. These ideals were codified in the Associative Act of 4669 AR, written by the first members elected to the People's Council (see Government below). To the east lie the nations of Galt and Taldor; much of Andoran's eastern border lies within the Verduran Forest, and follows the flow of the Sellen River.[3] The nation can be divided into five general regions: the capital city of Almas and its surrounding countryside, the coastal Arthfell region, the agriculture-rich Carpenden Plains, Darkmoon Vale, dominated by the Lumber Consortium, and the fey-contested Verduran Forest.[4] Andoran's interior is dominated by plains and hills, and the remnants of Arthfell Forest. It's these individua that are responsible for overseeing all aspects of the nation's government, from the selection of mayors for each municipality to the running of Andoran's military forces.[3][14] Main article: Supreme Elect The People's Council is led by the Supreme Elect, a position appointed by the Council's members following each election. Andoren merchants rallied the common folk behind the egalitarian principles of the Galtan philosophers Darl Jubannich and Hoseter and declared their independence from the empire, casting aside the noble class' right to rule and establishing rule by the will of the people: the Common Rule. Andoran continues to embody these ideals to this day, concepts they attempt to force upon other nations with what many feel to be idealistic and imperialistic fanaticism.[3][11] Soon after its founding, a contingent of gillmen visited the newly established democratic nation. There was only so much obedience to Egorian that the Andoren people could stomach. Andoran, Spirit of Liberty, p. 2-3. Campaign Setting, p. 201–203. Andoran holds the reins of its own destiny in the strong hands of its people; it considers itself the birthplace of freedom.[2] Andoran is located on the northern coast of the Inner Sea. The proud people of Andoran claimed their nation's sovereignty, and are determined to prove to disbelievers that the concepts of freedom and equality that they hold will remain strong in the face of any hardship.[23] The people that inhabit the nation of Andoran are also highly opinionated, often holding differing perspectives on how best to preserve their nation and spread its influence. Darkmoon Vale in the northwest is dominated by Droskar's Crag, a massive volcano that serves as the southernmost point of the Five Kings Range.[3][5] See also: Timeline of Andoran The Taldan Fourth Army of Exploration explored and mapped the region in 1683 AR.[6] impressed by the area's abundant forests and other natural resources, Taldor invaded in 1707 AR. The nation even exhibits a willingness to bring its military might to bear when no other means of accomplishing this goal remain.[3][16][2] During the People's Revolt, revolutionaries opened all of Andoran's prisons and freed its slaves, partially on ethical grounds, and partially to bolster the Revolt against foreign and domestic anti-revolutionary forces. Andoran's banks provide readily accessible and affordable credit to the nation's people, though any who seek to exploit this system are exiled as traitors.[3][18] Andoran profits from resources beyond its borders as well. ISBN 978-1-60125-247-0 † James Jacobs et al. Everyone is entitled to their opinion, so long as it is not actually that of a foreign power. The supreme vicar also acts as the bishop of Almas, and oversees the actions of all Andoran's faiths. [3][15] Main article: Andoren foreign relations Being the only country in the Inner Sea region with open, democratically-elected leaders, Andoran's relations with its more autocratic neighbors is generally poor. I was also a co-creator of the "Birthright" campaign setting, and won an award for the mega-adventure "Dragon Mountain." It turns out that I've moved around a lot: from Illinois to Utah to Illinois again to Wisconsin to California to Michigan, with a smattering of international travel in between: England, France, Spain, Corsica, Costa Rica, Jamaica, and the real exotics - Canada and Mexico. Additionally, the nation's three leading exporters, House Goldfield, House Naran, and House Vaylen, operate large and profitable banks within the region. The coastal city of Augustana was founded the same year, and the new invaders quickly began felling the trees of the extensive Arthfell Forest to feed the rapidly expanding Imperial Navy. This civil war ended with House Throne claiming control of Cheliox in 4640 AR.[3][7][10] House Throne, a noble line dedicated to the service of infernal powers, demanded strict obedience and servitude from the citizens of the empire. These goods are sometimes rare, often difficult to locate and obtain, and many groups fight one another to possess them; despite the risks involved, these items generate significant wealth for Andoran. Andoran, Spirit of Liberty, p. 13. This fear is reinforced by Andoran's efforts to spread its cultural, mercantile, and philosophical beliefs beyond its borders. Andoran, Spirit of Liberty, p. 10–11. Heart of the Jungle, p. 49. Arguments and discussions should be based on merit, rather than half-truths or falsehoods. When the Gray Corsairs sank three of these ships the following year, it began what some call the Andoren War Against Slavery.[17] Andoran is a nation with abundant natural resources, and transport ships carrying lumber, minerals, and other goods frequently leave the cities of Almas and Augustana for destinations throughout the Inner Sea region and beyond. (2020). This brings Andoran into conflict with the primary states supporting slavery in the Inner Sea region, particularly Cheliox, Katapesh, Osirion, and Thuvia. Based out of the capital city of Almas, these individuals are elected by the nation's populace every five years; Andoran is divided into numerous municipalities, each of which is allowed to elect a single representative to the Council. I've found that everyone wants a good story. I hope to tell you one. The Inner Sea World Guide, p. 43. Andoran, Birthplace of Freedom, p. 5. (2008). The Supreme Elect manages the nation's Executive Office, and acts as the mayor of Almas. These abolitionist ideals continue to this day, with the Andoren government forbidding any trade in sentient creatures, as well as sending out agents to undermine slavery abroad. Their lands and holdings became property of the state in either case and were immediately sold off to those who had supported the People's Revolt.[3][11] The newly established nation abolished the practices of slavery and servitude, and embraced the belief that all are equal. ISBN 978-1-60125-721-5 † Tim Hitchcock et al. The Inner Sea World Guide, p. 19. The move was prompted by Aspex the Even-Tongued of Cheliox, who sought to add the region to his fledgling empire in what would become known as the Even-Tongued Conquest. These setbacks were temporary, however, and did little to deter the nation's growth.[2] The avoral Talmandor is the spiritual patron of Andoran. By embracing and preserving these beliefs and others like them, the people of Andoran hope to ensure Common Rule, and the freedom it brings, for many generations to come.[23] As a former province of Taldor, most Andoren humans speak the Common tongue, Taldane.[2] Paizo published two books on Andoran: Andoran, Spirit of Liberty and Andoran, Birthplace of Freedom. Under the command of General Khashtalus of Corentyn, the native peoples were put to the sword and Andoran became the westernmost province of the great Taldan Empire. Andoran (pronounced ann-DOHR-ann)[1] is a nation of the people, governed by the principles of Common Rule which grant every citizen a voice. All people have a right to have their voice heard, and one should be judged by their actions above all else. They presented the government with the keystone of the Arch of Aroden, which they had dragged there from the bottom of the Hespereth Strait, symbolizing their support for Andoran's commitment to freedom and equality. The Inner Sea World Guide, p. 37. The Five Kings Range perform a similar function in the north, serving as a barrier between Andoran and the nations of Druma, Isgar, Kyonin, and the Five Kings Mountains. The rise of the Andoren navy and shipping industry began a new golden age of exploration for Taldor, eventually leading to the founding of colonies not only in Avistan and Garund, but also far-away Azlant and Arcadia. [3][7][2][8] The forests of Andoran were not the only things that Taldor exploited. This individual serves primarily as an adviser to the Supreme Elect. Artifacts and resources originating in exotic locations such as Osirion, the Mwangi Expanse, and even Azlant and Arcadia are gathered and sold. ISBN 978-1-60125-721-5 † Mike McArtor. Merchants in towns and cities grew rich exploiting the country's bountiful natural resources until their power rivaled that of the hereditary landed nobility. After nearly thirty years of infernal dominance, the People's Revolt erupted in 4669 AR. Despite its economic success, the nation still had its share of challenges: hobgoblin attacks in the northwestern wilderness, pirates on the open seas, druidic and fey troubles in the Arthfell and Verduran Forests, and disrupted trade with its colonies in Arcadia. A history of being ruled by foreign powers, first under Taldor, and then Cheliox, resulted in a heavy burden; over time, as the region's resources and the people's independence were slowly worn away, this burden grew too great to be tolerated any longer. Guide to Darkmoon Vale, p. 7. Campaign Setting, p. 246. Andoran, Spirit of Liberty, p. 7–8. Initially the ruling body of Andoran followed the mandates of Cheliox's new queen, judging that the populace was not ready for another conflict after three decades of civil war.
